

# OPERATION TREE CANOPY

**Help scientists study the cooling  
benefits of urban trees in Riverside.**

Join us to collect data and help scientists study the cooling effects of different tree species.

Volunteers will collect leaves and data about tree condition, size, and location, so UC Riverside scientists can correlate the data to high altitude aerial photos taken by NASA.

A project of Earthwatch Institute.

**Saturday, August 22, 2015**

**9 AM**

**at White and Boardwell Parks**

Training and tools will be provided.

Field collections are conducted within three weeks of the NASA fly overs so ground-collected data will correlate to high altitude aerial photos.

**To volunteer, please contact  
Erin Snyder at 951 683-7691 ext 207 or [Snyder@rcrcd.org](mailto:Snyder@rcrcd.org)**
